# NOLA MOTORSPORTS

Barriere produced and paved nearly 80,00 tons of asphalt (4,700 truck loads) for a once-in-a-career project for NOLA Motorsports consisting of a 1.3-mile go-karting track, a 2.75-mile road course (with a future additional 2.6-mile track), and a 7.5-acre autocross pad, as well as numerous parking lots, roads, and work areas.

Barriere worked with one of the asphalt industry's best engineers, Brian D. Prowell, Ph.D, P.E, to met his stringent asphalt guidelines including no seams or joints and an asphalt mixture that could handle cars traveling over 200 mph to qualify the track for international races.
